

AngularJS Training

Description

AngularJS is a structural framework for dynamic web apps. It lets you use HTML as your template language and lets you extend HTML's syntax to express your application's components clearly and succinctly. Angular's data binding and dependency injection eliminate much of the code you currently have to write.

Syllabus

- Introduction to angularJS
- Our first AngularJS application
- Single Page applications
- Controllers
- Models
- Views
- Expressions
- Filters
- Scopes
- Angular Forms
- Ajax, Data and angular Directives
- Testing in Angular
- Angular user interfaces
- Angular services
- Developing customer directives
- Enhance End-to-End testing
- Conclusion

Learning Outcomes

AngularJS training teaches developers how to use AngularJS to facilitate development of single-page web applications that use the model-view-controller (MVC) design pattern. Attendees also take advantage of the frameworks more sophisticated features.

Participants and Requirements

Participants need a thorough understanding of JavaScript, HTML and CSS. A jQuery background is highly helpful.
